TECHNICAL MANAGEMENT

**Total control and management
of your investment**

WE INVEST IN CONTROL AND OPTIMIZATION OF YOUR INVESTMENT

TECHNICAL MANAGEMENT

- Supervision of your power plants and detection of technical problems and analysis of the causes that created them
- Quality inspections of the asset to improve performance and operation.
- Keeping and updating necessary licenses
- Compliance with environmental regulations
- Inventory management of spare parts
- Management of asset's equipment warranties
- Ensure operation of your investment on the basis of current legislation and immediate notification of changes to the plant's laws

REPORTS for the performance and operation of the power plant

- Drawing up performance reports monthly to update production and availability of the asset
- Evaluation and analysis of plant production data and proposals to maximize its profitability
- Creating technical assessments for insurance companies and banks in the event of claims for damages (eg natural disasters, thefts, extreme weather events)
